Toxicology Excellence for Risk Assessment Expands Reach and Mission with Recent Strategic Acquisitions

Social search key, and alt media teaser: Nonprofit broadens reach across science, education, and the legal community

CINCINNATI, OH — April 21, 2026 — Toxicology Excellence for Risk Assessment (TERA) today announced it is positioned for significant growth following the acquisitions of the Center for Truth in Science (2026) and the Toxicology Education Foundation (2025). Together, these additions strengthen TERA's ability to serve Government, NGOs, Industry, educators, the legal community, and the public with unbiased science.

Key highlights of TERA's expanded capabilities:

- **Legal Community Support:** The Center for Truth in Science helps lawyers, judges, and regulators interpret toxicological data for informed, unbiased courtroom decisions.
- **Public Health Education:** The Toxicology Education Foundation, paired with TERA's Kids Chemical Safety program, equips educators, parents, and the public to make informed decisions about chemical safety.
- **Professional Training:** TERA's acclaimed Dose-Response Assessment Boot Camp Course and RACE (Risk Assessment Continuing Education) program offer CE-eligible training for every career stage.
- **Risk Assessment Services:** Risk assessments and independent peer reviews for Government, NGOs, Industry, and medical device manufacturers.
- **Worker Safety:** TERA has led the industry-standard OARS-WEEL program since 2013, setting peer-reviewed safe exposure levels through a global volunteer committee.
- **Global Data Access:** The ITER database compiles peer-reviewed risk values from CDC/ATSDR, Health Canada, RIVM, U.S. EPA, IARC, NSF International, and others.
